

City of Logan Sanitary Landfill Logan, Utah

Presented at 5th Annual LMOP Project Expo – December 14, 2001

The City of Logan is interested in finding an energy end user and is seeking a project developer to help advance the project. The City of Logan is located in Northern Utah, north of Salt Lake City, in the heart of picturesque Cache County, Utah. The landfill is publicly owned and operated by the City of Logan.

The City of Logan Sanitary Landfill was opened in 1961 and is expected to close in 2016. As of 2001 there 1.4 millions tons of waste in place, and the site accepts 80,000 tons per year. There is currently no gas collection system in place.

The site is located in Logan at 1800 West, 200 North, only four blocks from an industrial corridor, so there are many possible end users.

LMOP conducted a preliminary feasibility assessment for the Logan Landfill earlier this year, and it is available to interested parties.

We hope you'll come out and visit us. It's a beautiful part of the country, and we feel a good opportunity for a landfill gas utilization project.

Please contact Issa Hamud if you'd like more information, or want to talk about the possibility of a project.

The Environmental Protection Agency's Landfill Methane Outreach Program would like to thank the City of Logan for participating in this year's Project Expo.

Landfill Specifications

Waste in Place	1,400,000 tons
Acceptance	80,000 tpy
LF Area	85 acres
LF Depth	10-100 feet
